Some attempt but not an effective design.
No ~~B P F G E~~
35. Clustered critical period use?
Particularly pasture 3 ~~B P F G E~~
36. Pasture stocking balanced with capacities?
Scheduled use pasture 2 appears to over-obligate. ~~B P F G E~~
37. Too many herds? ~~B P F G E~~
38. Reasonable pasture move sequence?
But poor system ~~B P F G E~~
39. Effective system? Better options?
System little better than season-long. Many options. ~~B P F G E~~

ACTUAL USE

40. Is system followed? ~~B P F G E~~
Lots of use outside/longer than scheduled seasons
2 of 3 pastures, Apparent very light stocking may
be only reason pasture 2 is apparently performing.
The range (rds) that design followed, evaluated, and
continued this grazing system needs extensive
training in plant/cow relationships
